Notes from phone conversation with senator Miller July 9, 2015 @ 1pm.

We commiserated about the problem of lack of data at the school level. He mentioned that a committee implementing SB500, is looking at reducing the data required of school districts. Miller pointed me to Dollars To The Classroom on the Indiana OMB website. We also discussed a Indy chamber report (I opined that it was useless). He mentioned that the state board of accounts was under resourced and not equipped to look a school level expenditures.

I thanked him for his follow up and time to talk with me. He asked if I had some specifics on the data needed, he would want to see it.

I plan to follow up with him in September.
